Information Management for Disaster Risk Reduction and Response in Afghanistan (IM-D3R)

Afghanistan

iMMAP

Context

Over 40 years of conflict and insecurity, recurrent natural hazards, increasing poverty, drought, and the COVID-19 pandemic have – and continue to - devastate the people of Afghanistan, severely depleting their capacity to cope with increasing needs.

The recent Integrated Food Security Phase Classification (IPC) analysis shows that between June to November 2022, 18.9 million people (45% of Afghanistan's population) are expected to experience crisis levels of food insecurity (IPC 3 and above).

While the overall level of conflict has now dropped, recent events and their resulting upheaval have only exacerbated needs and further complicated an extremely challenging operational context. A total of 24.4 million people across Afghanistan are in need of life-saving humanitarian assistance in 2022.

iMMAP Afghanistan

Funded by USAID, iMMAP has been actively operating in Afghanistan since 2010.

iMMAP delivers Information Management (IM) products and services to key partners in humanitarian response and Disaster Risk Reduction (DRR), including but not limited to the humanitarian clusters, UN agencies, USAID implementing partners, and NGOs.

iMMAP works towards ensuring that data consistency and standardization is integrated into all systems for a more efficient and cost-effective emergency response by humanitarian actors.

Donor: USAID

**Presence in Afghanistan:** Since 2010

Current project: Information Management for Disaster Risk Reduction and Response in Afghanistan (IM-D3R)
Project budget: USD 4,757,000

Number of partners iMMAP currently supports: 103

Personnel
Number of personnel: 51

Services

Information management services: iMMAP provides ad-hoc IM support to all the humanitarian clusters for specialized tasks, such as the production of operational presence dashboards.
ReportHub: ReportHub is an online reporting platform that addresses the gap in reporting operational data across organizations by streamlining the information flow between clusters, working groups, partners, and the Humanitarian Country Team in support of the Humanitarian Response Plan.

COVID-19: Within the framework of ongoing support, iMMAP is assisting the clusters and cluster members to monitor the COVID-19 response through ReportHub and providing our partners with remote IM assistance.

ASDC: The Afghanistan Spatial Data Center (ASDC) is a geospatial platform that provides critical information to line ministries and aid organizations for DRR, planning, and emergency response, users can access updated interactive dashboards and maps. ASDC will be reactivated this year with new features.
HNO/HRP support: Support to clusters in the estimation of planning figures for the Humanitarian Needs Overview, cluster inputs to the Humanitarian Response Plan, and monitoring the quarterly and annual People Reached figures to OCHA's Response Planning and Monitoring Module platform.

Capacity Strengthening: We empower humanitarian stakeholders and national capacities to reach a professional understanding of the principles and best practices of IM in humanitarian and DRR contexts. This is achieved through our internship program, specialized training, and workshops tailored to the needs of our partners.

ReportHub

Number of Organizations Utilizing ReportHub

Year	Number
2017	66
2018	69
2019	67
2020	84
2021	93
2022	103 *

* Represents the number of organizations reported from January to September 2022. This number is expected to rise by the end of the year.

# ReportHub: Number of Partners by Cluster / Working Group

Cluster / Working Group	Number
FSAC	43
Health	40
WASH	36
Protection	31
ES-NFI	22
CVWG	20
Nutrition	5
EiEWG	3
CCCM	2

Data extracted from ReportHub covers January - September 2022
